LondrCoin Litepaper v4

1. Introduction

LondrCoin ($LONDR) is a meme-rooted ERC-20 token built on Ethereum, combining fun internet culture with transparent tokenomics and real DeFi utility. Inspired by the service economy, LondrCoin rewards innovation, participation, and experimentation across decentralized platforms. It is intentionally fun, community-driven, and transparently limited.

2. Tokenomics

1   Max & Total Supply: 100,000,000,000 LONDR

2   Decimals: 18

3   Minting: Fully minted at launch, no further minting possible

4   Burnable: Yes, via ERC20Burnable extension

5   Liquidity: Initial $1,000 pool seeded on Uniswap (ETH pair, Q1 2025)

3. Contract Details

1   Contract Address: 0x97d1A1b493D83A35A30d7D868e0e1D821F15D424

2   Verified on Etherscan

3   Built using OpenZeppelin (ERC20, Ownable, Burnable)

4   Compiler: Solidity 0.8.26

5   Optimization: Disabled (for simplicity)

4. Vision & Use Cases

LondrCoin exists to fuel lightweight reward systems, meme tipping, and decentralized engagement. It can be integrated into service platforms, used for marketing games, or distributed through community contests. The token embraces internet culture while maintaining transparent tokenomics and community governance potential.

5. Roadmap

1   Q1 2025: Contract deployed, verified on Etherscan, initial liquidity added

2   Q2 2025: CoinGecko & CoinMarketCap listing applications, community launch

3   Q3 2025: Liquidity lock, marketing campaigns, meme contests, partner airdrops

4   Q4 2025: Explore DAO governance integration, staking/utility experiments

5   2026: Tier 2 exchange listing applications, community-driven roadmap expansions
